

# Ladislav Vrbsky

Data Scientist; passionate for Big Data and Artificial Intelligence (AI);  
MSc in Computer Science/AI; Experienced in Software Development; Curious;  
Multi-cultural; Wants to use modern technologies in AI and Data projects.

## EXPERIENCE

- Data Scientist / Machine Learning Engineer** Jan 2019 – Present  
Vibe Desenvolvimento (SW dev. company) [Python, SQL, Shell, Spark, Hive, Sqoop, ...]  
*Data and Big Data tasks at a state bank Banpará, leveraging the Hadoop ecosystem and Machine Learning (ML)*
  - Created and managed ETL/ELT data pipelines
  - Lead the transformation to being data-driven by evangelizing and educating many about Data and ML
  - Proactively suggested and currently delivering concepts of valuable projects and KPIs
  - Co-administered and configured a Hadoop cluster
  - Will leverage ML to aggregate value using data (Spark ML, TensorFlow or PyTorch)
- Software Developer - Web** Oct 2017 – Jan 2019  
Vibe Desenvolvimento (SW dev. company) [Java, C#, SQL, CI/CD, JSF, JSP, AngularJS, JS, ASP.NET, SVN]  
*Internet banking web apps, management systems, RESTful web services for a state bank Banpará*
  - Developed, improved, maintained a variety of new and legacy systems (mostly back-end)
  - Boosted 3x tech support speed by improving automation tool (for 1 frequent issue)
  - Crushed high-impact bugs in production
  - Reduced from hours to minutes solutions of some team tasks by knowledge of various systems
  - Worked in small teams, collaborated with technical requirements team
- Applied Artificial Intelligence Researcher** (CAPES scholarship) Jan 2016 – Apr 2018  
Operational Research Lab (Electrical Engineering faculty lab) [Matlab, ~~TeX~~, Git]  
*Smart power grid communication optimization research through cell positioning - Related to MSc Thesis*
  - Implemented a clustering-based topology optimizer for networks w.r.t. communication delay (Open-Sourced)
  - Compared clustering algorithms and >50 k-means/model configs, resulting in MSc thesis: *Clustering-driven equipment deployment planner and analyzer for wireless non-mobile networks applied to Smart Grid scenarios*
- Junior Software Developer** Apr 2013 – Aug 2014  
AgentFly Technologies (Commercial/university startup at Agent Technology Center) [Java, XML, CVS]  
*Large-scale multi-agent project, that models and simulates air traffic control*
  - Implemented event-oriented collision avoidance protocol for UAVs, a.k.a drones
  - Optimized heuristic of route generation by extrapolating the collision-based utility values
  - Analyzed 4 heuristics of route generation w.r.t. computational and communication costs, and 4 other metrics

## PROJECTS & PUBLICATIONS

- ICNSC 2017 (Intl. Conference): Clustering techniques for data network planning in Smart Grids:**  
Determines deployment positions of Base Stations in a network. Compares clustering algorithms.
- Fraud detection in energy network:** Neural Networks, Decision Trees, Fuzzy Logic, Genetic Algorithm
- Memetic algorithm for Traveling Salesman Problem:** Genetic Algorithm with local search
- AI projects:** Transfer learning (TensorFlow), Simple app using TF.js, Color quantization (Matlab)

## SKILLS

- Languages:** Python 2 yrs, SQL 2 yrs, Java 4 yrs, C# 1 yr, C/C++ 1 yr, Matlab 3 yrs, JS | **Eng, Por, Cze, Ger**
- Techniques:** Clustering, Neural Networks, Genetic Algorithms, Decision Trees, Graphs, Probability, ...
- Interests:** TensorFlow, PyTorch, SciKit-Learn, Spark, Reinforcement Learning, Computer Vision

## EDUCATION

- Federal University of Pará (UFPA)** | GPA 3.889 Belem, PA, Brazil  
MSc – Applied Computing: Artificial Intelligence Mar 2018
- Kansas State University (KSU)** | MSc period – Computer Science (intl. exchange) Manhattan, KS, USA
- Czech Technical University (CTU)** | BSc – Computer and Information Science Prague, Czech Republic
